

Perzeption

```
graph TD; A[Perzeption] -.-> B[Adaptive Abstandsregelung]; A -.-> C[Spurhalte-System]; A -.-> D[Spurwechsel-System];
```

The diagram illustrates a control architecture where a single 'Perzeption' (Perception) module feeds into three distinct control systems. The 'Perzeption' module is represented by a large rounded rectangle on the left. A horizontal dashed line extends from its right side, from which three vertical dashed lines with downward-pointing arrowheads branch out to three smaller rounded rectangles below. These three rectangles are labeled 'Adaptive Abstandsregelung', 'Spurhalte-System', and 'Spurwechsel-System' from left to right.

Adaptive  
Abstandsregelung

Spurhalte-  
System

Spurwechsel-  
System
